SUMMARY

B.Tech Computer Science (Cybersecurity) undergraduate with expertise in penetration testing, vulnerability assessment, and web application security. Hands-on experience in bug bounty hunting, secure website development, hosting, and attack simulation, with strong knowledge of networking, operating systems, and threat analysis. Actively seeking cybersecurity internship opportunities to apply technical and analytical skills in real-world environments.

EXPERIENCE

Cybersecurity Trainer (Part-time) 06/2025 - Present
[The Drop Organization](#)

A leading cybersecurity organization specializing in training and research

- Conducted live cybersecurity training and developed technical content with guided vulnerability analysis to strengthen students' practical skills.

Tech Head (Volunteer Role) 12/2025-Present
[VED](#)

Registered NGO - Non-Profit

- Owned and managed all technical responsibilities for the organization's digital presence, including secure website deployment, hosting, configuration, and ongoing maintenance

PROJECTS

White Crow

Web Applications security scanner

- A comprehensive web vulnerability scanner with a sleek desktop GUI, designed for professional security testing and penetration testing.

VerifEye

Browser Extension

- A Chrome extension that enhances user security by identifying online threats and protecting against them by injecting a script into the webpage.

Sakha Sampark

Serverless chatting system

- A serverless, decentralized chat platform using WebRTC to enable secure communication with complete privacy and confidentiality.

EDUCATION

B. Tech in Computer Science and Cybersecurity Aug/2023 - 2027
[Bennett University - The Times Group, Greater Noida](#)
High school and Senior secondary May/2023
[Lucknow Public School, Sitapur](#)

ACHIEVEMENT

Try Hack Me Top 7%:
<https://tryhackme.com/p/Ayushman.Misra>

Core Research Team Member Ciphers Club

Participated in cybersecurity discussions, research-oriented sessions, and knowledge-sharing activities within the student community.

SKILLS

TECHINICAL SKILLS

Forensics, Penetration Testing, Cybersecurity, Ethical Hacking, IoT, AI/ML, DBMS, Website Hosting, Bug Hunting

TOOLS

Nmap, Burp Suite, Metasploit Framework, OWASP ZAP, SQL Map, Hydra, Nessus

PROGRAMMING

C/C++, Java (Basic), Python, Shell Scripting

SOFT SKILLS

Public Speaking, Leadership, Team Management
